Owing to the inclement weather of last evening not as large a number of people as was expected presented themselves aboard H. B. M. S. Icarus. The captain and officers entertained their guests royally. The Hawaiian Band furnished the music.

Sensible
Nursing Bottle.

The common, everyday nursing bottle is built on a poor plan. It has but one opening. Through this the milk is admitted, and from it, through a nipple, the child struggles to get it out. The law of physics cannot be ignored even in so simple a thing as a nursing bottle. The vacuum left by the milk must be filled. The nipple collapses, and to relieve this the child stops feeding for a moment. Air rushes into the bottle. The child starts feeding again, and repeats the performance until the contents are taken.

The "Best Nurser" is made on a novel plan. A valve in the bottom of the bottle admits air as the contents are taken. The child feeds easily, without any danger of wind colic; no collapsing nipple, no worrying, crying infant. Price 25 cents.

CAN
YOU

Sell me a Diamond as cheaply as I can get one from the States? This is a question we are often asked. We answer: Yes, we not only can; but we do.

We have had many opportunities for comparison, and we have never found that our prices suffered by such comparison.

The trouble is that too many people take too much for granted. They believe that such and such is the case, and do not take the trouble to look carefully into the matter.

How often do you find that by staying at home, you could have done

Just as Well.

Now, what is the value of a Diamond?

Anywhere from \$50 to \$500 per Karat.

Do you know the difference?

We do, and that's the reason we know how to buy and how to sell.

Our stock contains many fine specimens of gems, and we tell you just what we know to be the truth.

Solitaires from \$15 to \$400.

A wide range, but plenty in-between at prices which will fit your purse.

Cluster rings of the newest shapes.

Birthstone rings; some as cheap as \$3.
